Professional summary

Computer Engineering graduate from Kuwait University with a strong foundation in computer networks, cybersecurity, software development, and cloud technologies. Experienced in applying technical knowledge through hands-on projects involving secure network architecture, system development, and cloud-based solutions. An adaptable and analytical problem-solver with strong communication and teamwork skills, seeking to contribute to innovative technology solutions while expanding expertise in information security and cybersecurity governance.

Education

03/2021 – 05/2026 **Bachelor's in Computer Engineering**
Bachelor in Computer Engineering, Kuwait University
relevant coursework: Advanced Computer Networks, Cryptography, Database systems and management, Embedded systems, Digital Logic Design, and Software Engineering.

Awards

08/01/2026 **Digital Transformation Award**
KPC

07/01/2026 **Best Capstone design project in Computer Engineering department**
KFAS

07/04/2026 **Dean's Honor List**
Kuwait University

Projects

01/2025 – 12/2025 **EmaraTech: Real-Time VR-Based Integrated Architectural System**
Capstone Design project
Senior capstone project focused on building a real-time VR platform that transforms architectural models into immersive, interactive environments. Implemented model processing, live synchronization, and user interaction features to support architects and clients in design review and collaboration.

07/2026 – 08/2026 **FoundKU — AWS Lost & Found Web Application**
AWS Cloud project
Developed a web application for Kuwait University students to report and search for lost and found items, integrating AWS cloud infrastructure including Amazon S3, API Gateway, and database services to store, retrieve, and manage item data through a user-friendly interface.

10/2024 – 12/2024 **TCP Pipelined Transmission & Non-Blocking Chat System**
Networks Course project
Built a client–server networking system using Python sockets with non-blocking I/O. Implemented pipelined TCP message handling, connection multiplexing, buffering, and error handling to support multiple simultaneous clients without threading.

03/2026 – 04/2026 **Network Architecture for a Hospital**
Advanced Networks
Designed a secure and scalable enterprise network infrastructure for a multi-floor hospital and remote clinics using Cisco based solutions. Implemented a three-tier architecture including core, distribution, and access layers with VLAN segmentation, redundancy, wireless connectivity, firewall protection, and WAN connectivity for remote clinics. Contributed to network topology design, VLAN planning, device selection, IP addressing, and security considerations following Cisco SAFE principles.

10/2024 – 10/2024 **Atbash's Cypher**
Embedded systems course project
Simple Atbash's cypher project done using a microcontroller

04/2026 – 04/2026 **Round Robin CPU Scheduler Simulator using Python**
OS course project
Developed a Round Robin CPU Scheduler Simulator in Python as part of an Operating Systems project. The simulator models process scheduling, preemption, ready-queue management, and computes performance metrics such as waiting time and turnaround time.

Skills

Personal Skills:
Problem-Solving & Critical Thinking | Adaptability & Fast Learning | Creativity & Innovation | Analytical Thinking & Self-Learning | Self-Motivation & Initiative | Time Management & Organization

Professional Skills:
Project Management & Coordination | Task planning | Team coordination & collaboration | Leadership & Teamwork | Effective communication | Programming Tutoring | Presentations, technical documentation, and report writing | Research & Independent Learning

Technical Skills
Programming Languages: Python | C | C++ | C# | SQL | Verilog (HDL)
Software & Web Development: HTML | Django | .NET | CUDA | Algorithm Design | Flowcharting
Game Development: Unity | 2D Game Development | AR/VR Development | Interactive Game Design
Databases: Oracle Database | MySQL
Computer Networks & Cybersecurity: TCP/IP | VLANs | Network Design | Cisco Networking Fundamentals | Cryptography Fundamentals | NIST Cybersecurity Fundamentals
Engineering & Development Tools: Visual Studio | VS Code | AutoCAD | OrCAD | GitHub | Canva | Google Colab

Certificates

GDG KWT & WTM Fundamentals of Programming in Python (beginners)
completion date 29 Jul 2022

CCNA: Introduction to Networks (Cisco Networking Academy)
completion date 18 Dec 2024

IEEE CS GameDev Workshop
completion date 10 Nov 2025

First Aid & Emergency Response
completion date 12 Dec 2025

Certificate of participation M2 vision competition
completion date May 2026

Activities

08/2026 – Present
Kuwait
>_NoLockCode
Co-Organizer
Co-Organizer for a page sharing beginner friendly programming content and help organize free programming sessions.

01/2026 – 01/2026
Kuwait
Digital Transformation Exhibition - Ministry of Oil
Represented Kuwait University as part of the EmaraTech team at the Digital Transformation Exhibition under the patronage of the Minister of Oil.

10/2026 – Present
Kuwait
Member of Women in CyberSecurity MiddleEast (WiCSME)
