Profile

Computer Engineering graduate from Kuwait University with skills in programming, database, networking and problem-solving. Experienced in applying engineering principles through academic projects and technical coursework. Seeking opportunities to contribute to innovative technology solutions while continuing to develop expertise in software, systems, and emerging technologies.

Education

03/2021 – 05/2026
Sabah AlSalem University City

Bachelors in Computer Engineering
Bachelorin Computer Engineering, Kuwait University
relevant coursework: Advanced Computer Networks, Cryptography, Database systems and management, Embedded systems, Digital Logic Design, and Software Engineering.

Awards

08/01/2026
Digital Transformation Award
KPC

07/01/2026
Best Capstone design project in Computer Engineering department
KFAS

07/04/2026
Dean's Honor List
Kuwait University

Projects

01/2025 – 12/2025
EmaraTech: Real-Time VR-Based Integrated Architectural System
Capstone Design project
Senior capstone project focused on building a real-time VR platform that transforms architectural models into immersive, interactive environments. Implemented model processing, live synchronization, and user interaction features to support architects and clients in design review and collaboration.

07/2026 – 08/2026
FoundKU — AWS Lost & Found Web Application
AWA Cloud project
Developed a web application for Kuwait University students to report and search for lost and found items, integrating AWS cloud infrastructure including Amazon S3, API Gateway, and database services to store, retrieve, and manage item data through a user-friendly interface.

10/2024 – 12/2024
TCP Pipelined Transmission & Non-Blocking Chat System
Networks Course project
Built a client–server networking system using Python sockets with non-blocking I/O. Implemented pipelined TCP message handling, connection multiplexing, buffering, and error handling to support multiple simultaneous clients without threading.

03/2026 – 04/2026
Network Architecture for a Hospital
Advanced Networks
Designed a secure and scalable enterprise network infrastructure for a multi-floor hospital and remote clinics using Cisco based solutions. Implemented a three-tier architecture including core, distribution, and access layers with VLAN segmentation, redundancy, wireless connectivity, firewall protection, and WAN connectivity for remote clinics. Contributed to network topology design, VLAN planning, device selection, IP addressing, and security considerations following Cisco SAFE principles.

10/2024 – 10/2024
Atbash's Cypher
Embedded systems course project
Simple Atbash's cypher project done using a microcontroller

04/2026 – 04/2026
Round Robin CPU Scheduler Simulator using Python
OS course project
Developed a Round Robin CPU Scheduler Simulator in Python as part of an Operating Systems project. The simulator models process scheduling, preemption, ready-queue management, and computes performance metrics such as waiting time and turnaround time.

Skills

Tool & Platforms
Oracle, AutoCad, Orcad, VS, VS code, Unity, flowchart, .NET, canva, github, MySQL, HTML

Computer Networks
Computer Networks, TCP/IP, VLANs, Network Design, Cisco Networking Fundamentals, cryptography fundamentals

Problem Solving & Adaptability

Tutoring Programming

Programming Languages
Python, C++, C, C#, SQL, verilog, Cuda

Web design and development
used Django, HTML

game development
using unity making a 2d game and a VR based game

Certificates

GDG KWT& WTM Fundamentals of Programming in Python (beginners)
29 Jul 2022

IEEE CS GameDev Workshop
completion date 10 Nov 2025

Certificate of participation M2 vision competition
2026

CCNA: Introduction to Networks
completion date 18 Dec 2024

First Aid & Emergency Response
completion 12 Dec 2025

Activities

08/2026 – Present
Kuwait

>_NoLockCode
Co-Organizer
Co-Organizer for a page sharing beginner friendly programming content and help organize free programming sessions.

01/2026 – 01/2026
Kuwait

Digital Transformation Exhibition - Ministry of Oil
Represented Kuwait University as part of the EmaraTech team at the Digital Transformation Exhibition under the patronage of the Minister of Oil.

10/2026 – Present
Kuwait

Member of Women in CyberSecurity MiddleEast (WiCSME)
